

Fin Sight – Personal Finance & Investment Intelligence Platform

2. Project Statement

Managing personal finances, investments, and long-term financial goals has become increasingly complex due to multiple income sources, expenses, loans, and investment options. Many individuals struggle to gain a clear understanding of their financial health and often make decisions without proper financial insights.

FinSight is a full-stack financial management platform that enables users to track expenses, manage budgets, monitor investments, and achieve financial goals through intelligent analytics. The platform provides personalized financial insights, investment performance tracking, spending pattern analysis, and predictive budgeting recommendations. By combining financial planning tools with data-driven intelligence, FinSight empowers users to make smarter financial decisions and improve long-term wealth management.

3. Outcomes

- A centralized platform for tracking income, expenses, budgets, and savings.
- Investment portfolio monitoring with real-time performance analytics.
- AI-powered spending analysis and budget recommendations.
- Financial goal planning for savings, education, travel, retirement, and major purchases.

- Personalized financial health score and risk assessment.
- Interactive dashboards with reports and visualizations for financial insights.
- Secure authentication and role-based access management.
- Automated alerts for budget limits, investment changes, and goal milestones.

4. Modules to be Implemented

1. User Authentication & Profile Management

- User registration and secure login system.
- Profile setup including income sources and financial preferences.
- Role-based access control.
- Password encryption and account security features.

2. Expense & Budget Management

- Record daily expenses and categorize spending.
- Monthly and yearly budget creation.
- Expense trend monitoring.
- Budget utilization and overspending alerts.

3. Investment Portfolio Tracking

- Track stocks, mutual funds, ETFs, bonds, and other investments.
- Portfolio performance monitoring.
- Asset allocation analysis.
- Investment return and risk calculations.

4. Financial Goal Planning

- Create short-term and long-term financial goals.
- Goal progress tracking.
- Savings recommendations.
- Future financial projections.

5. Analytics & Intelligence Engine

- Spending pattern analysis.
- Personalized budgeting recommendations.

- Investment performance insights.
- Financial health scoring model.

6. Dashboard & Reporting

- Expense analysis dashboard.
- Budget tracking dashboard.
- Investment portfolio dashboard.
- Financial goal progress dashboard.
- Downloadable reports in PDF and Excel formats.

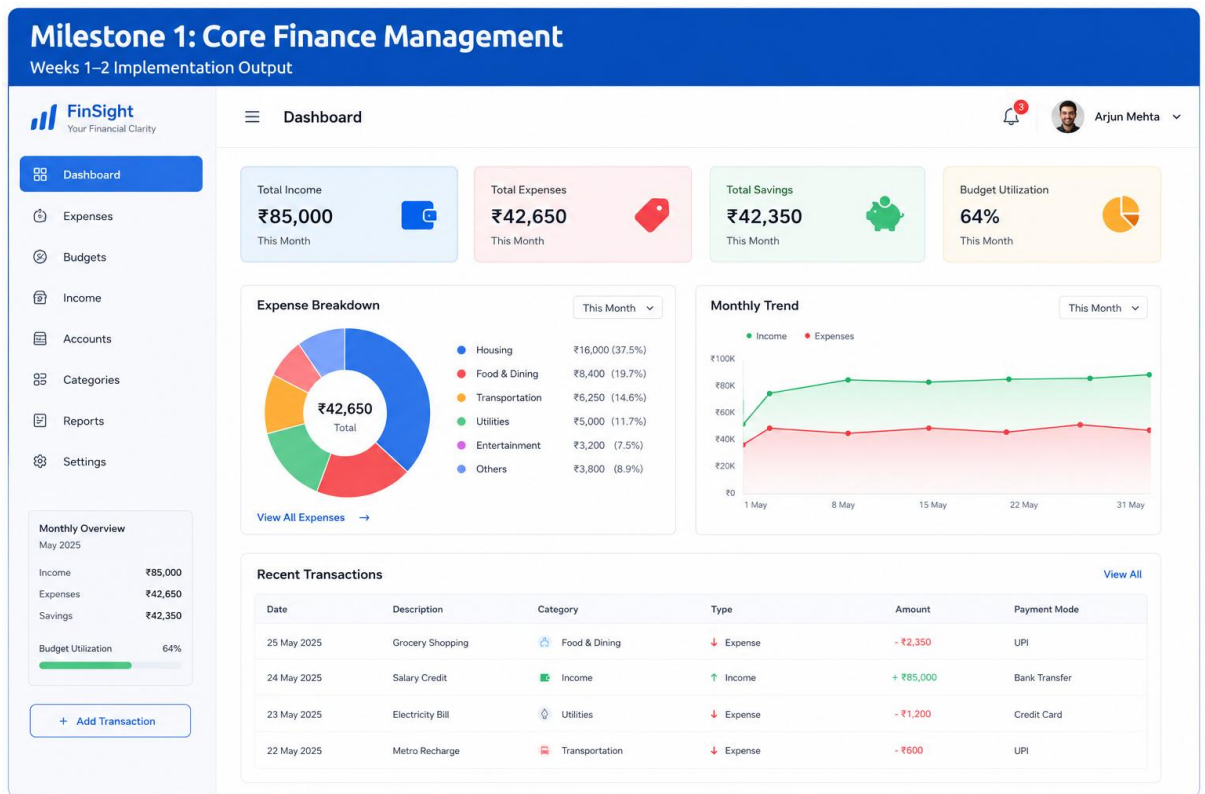

7. Notification & Alert System

- Budget threshold notifications.
- Investment performance alerts.
- Goal achievement reminders.
- Monthly financial summary reports.

5. Week-wise Module Implementation & High-Level Requirements

Milestone 1 (Weeks 1–2) – Core Finance Management

- Implement user authentication and profile management.
- Build expense tracking and categorization modules.
- Develop budget creation and monitoring functionality.
- Create initial financial dashboard.

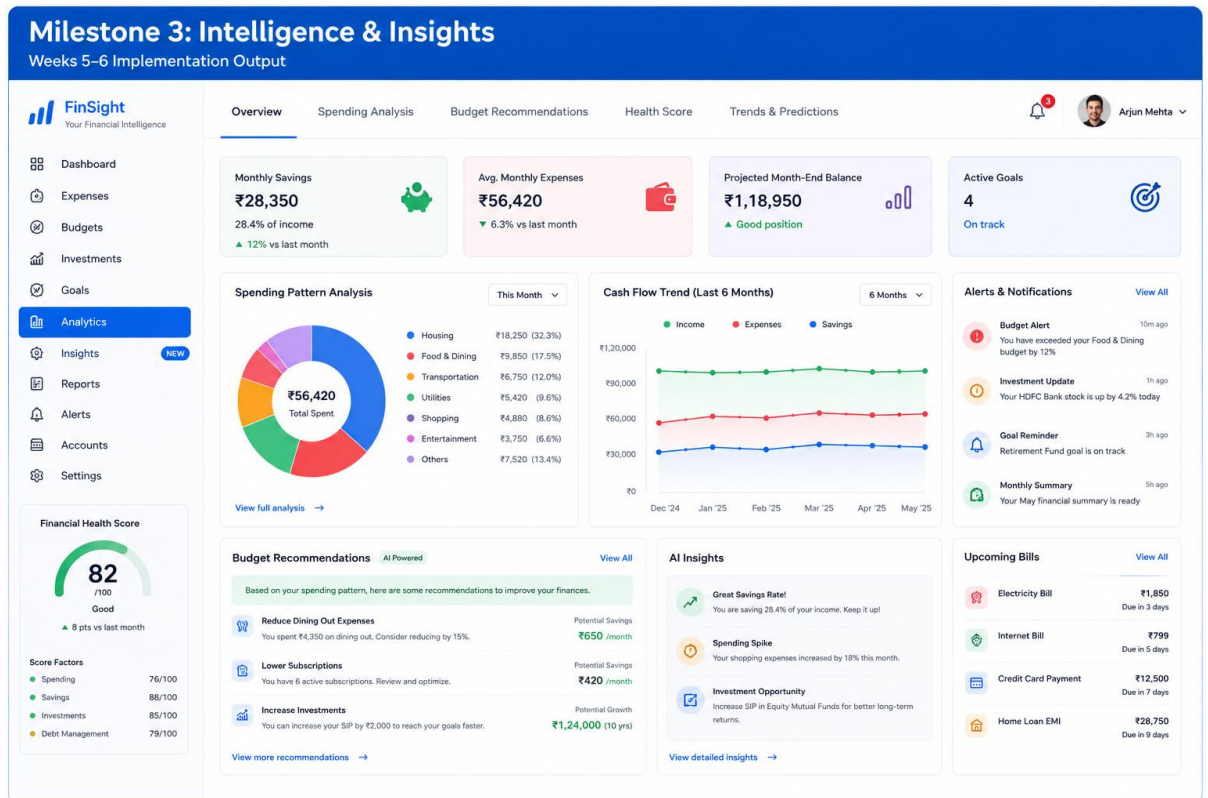

Milestone 2 (Weeks 3–4) – Investment Tracking & Goal Planning

- Implement investment portfolio management.
- Add asset allocation and return calculations.
- Develop financial goal planning module.
- Create portfolio analytics dashboard.

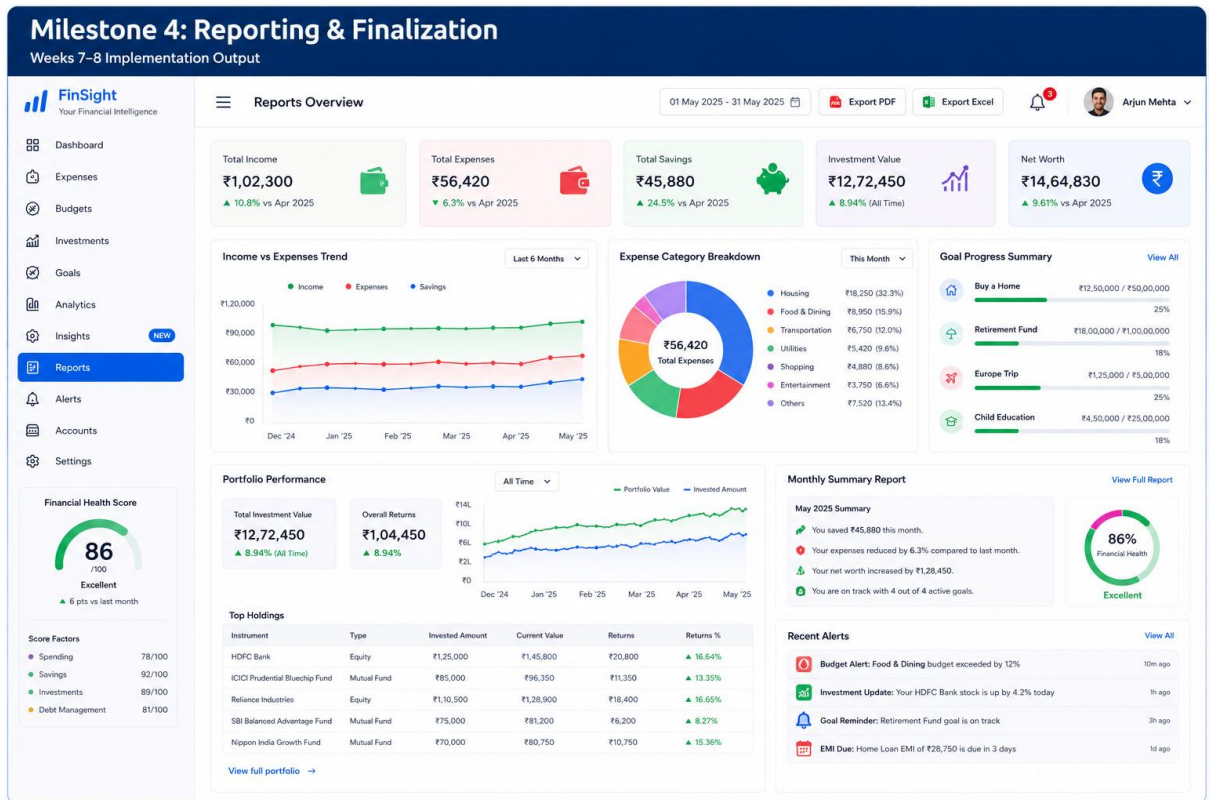

Milestone 3 (Weeks 5–6) – Intelligence & Insights

- Build spending pattern analysis engine.
- Generate personalized budget recommendations.
- Implement financial health score calculation.
- Develop alert and notification system.

Milestone 4 (Weeks 7–8) – Reporting & Finalization

- Build advanced financial reports and exports.
- Optimize dashboards and visualizations.
- Conduct testing and security validation.
- Deploy application and publish documentation.

6. Evaluation Criteria

Milestone 1 (Week 2)

- Users can register and securely log in.
- Expense transactions stored successfully.
- Budget tracking dashboard operational.

Milestone 2 (Week 4)

- Investment portfolio tracking functional.
- Asset allocation and returns calculated correctly.
- Financial goals created and monitored successfully.

Milestone 3 (Week 6)

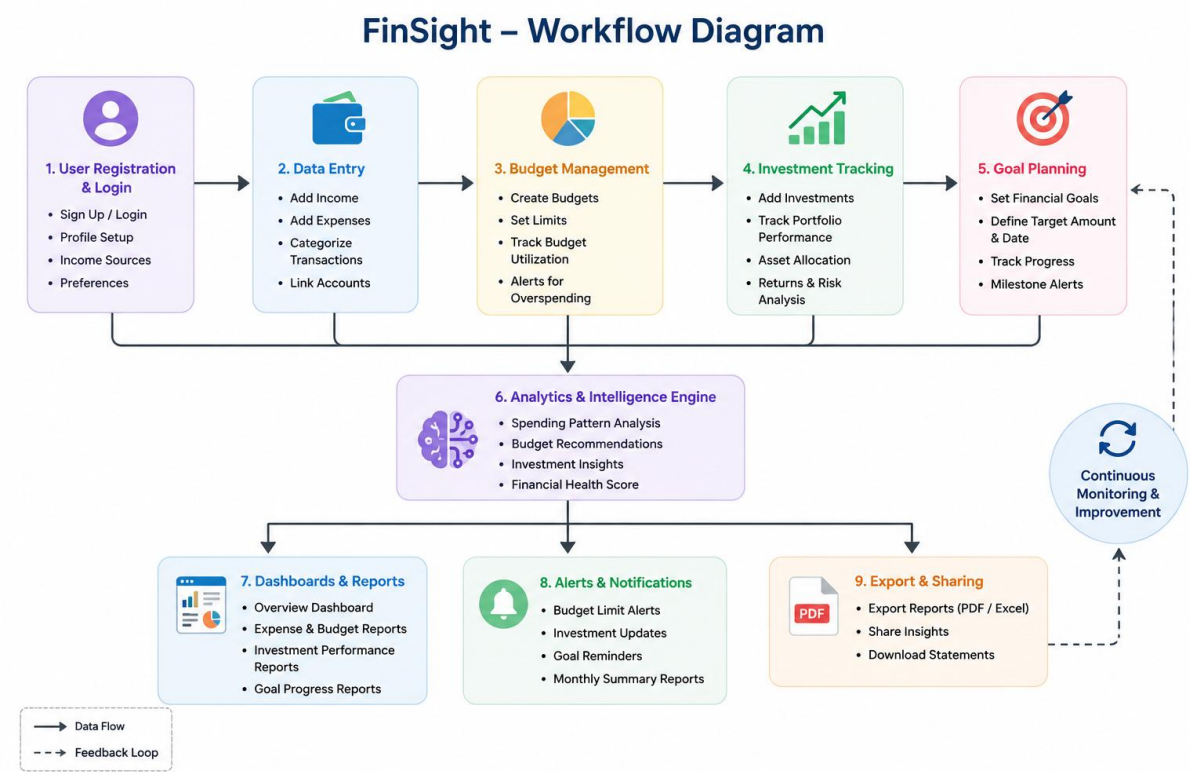

- Financial health score generated accurately.
- Budget recommendations generated based on spending behavior.
- Notification system functioning properly.

Milestone 4 (Week 8)

- Complete platform deployed successfully.

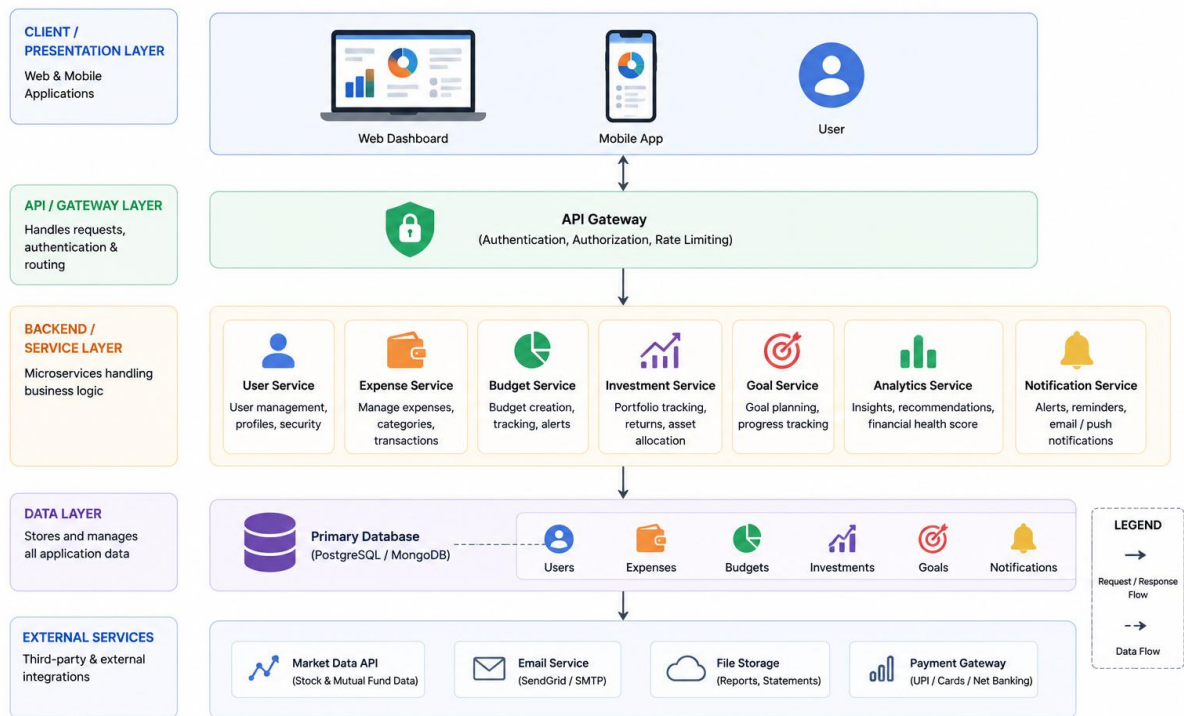

- Reports generated in PDF and Excel formats.
- Dashboard performance optimized.
- End-to-end financial workflow operational.
